# LIST OF ABBREVIATIONS

**ASRHR** Adolescents Sexual Reproductive Health and Rights

**AGYWS** Adolescents Girls and Young women's

**APO** Afyaplus Organization

**DC** District Council

**EWB** Engineers Without Borders

**MHH** Menstrual Health Hygiene

**MHM** Menstrual Hygiene Management

**WASH** Water Sanitation and Hygiene

**GBV** Gender Based Violence

**NGOs** Non Governmental Organizations

**SDGs** Sustainable Development Goals

**VSLAs** Village Saving and Loan Associations

# Message from the Executive Director

## Dear Partners

Receive our warmest greetings from the Afyaplus team. It is with immense pleasure and pride that I share with you our Quarter Two report, highlighting our journey towards advancing our mission.

We are thrilled to update you on our achievements for this quarter, as we continue to champion SDG 4 (Quality Education), SDG 5 (Achieve gender equality and empower all women and girls) and SDG 6 (Clean Water and Sanitation). Here are some key highlights: The construction of two hand washing stations in two secondary schools including Irole and Ismani which brings the total number of 40 schools reached by this project, the establishment of School Water, Sanitation, and Hygiene (SWASH) clubs in twelve schools in Iringa MC, an important component of our educational initiatives. Also, continue to monitor and evaluate our safe pad lab project operating in schools.

Also in partnership with the Malala Fund, we managed to organize Girls Vision for Education workshops in Iringa and Pwani Region: This program empowers girls and young women to redefine their educational experiences both in-person. We have reached 30 young girls, both in and out of school, gathering valuable insights and thoughts to help them achieve their educational dreams.

We are thrilled to welcome our new partner EWB USA, to support the Water Station Installation Project in Mangalali Village, Iringa District. This project will establish water stations in schools, health centers, and residential areas, significantly improving access to clean and safe water.

I invite you to read our full report and extend our heartfelt thanks for your continued support. As we embark on another quarter of Improving WASH while empowering Adolescents girls and Young women.

Best regards,

A handwritten signature in blue ink, which appears to read 'Suzan Yumbe', is positioned above the printed name.

**SUZAN YUMBE**  
**EXECUTIVE DIRECTOR**

# ABOUT AFYAPLUS ORGANIZATION

AFYAPLUS is a not-for-profit organization operating its core development agenda of prevention and control of diseases through the promotion of water sanitation and hygiene (WASH) and empowerment of girls and young women. The main goal of the organization is to improve school performance and create a community free from diseases caused by lack of safe and clean water, poor sanitation, and hygiene and empower adolescent girls and young women in a community.

## Our mission

To cultivate behavior change and build a strong community through the promotion of water sanitation and hygiene services and empowerment of adolescents girls and young women through engaging relevant stakeholders.

## Our vision

A responsible healthy Tanzanian community free from diseases caused by unsafe water, poor sanitation and hygiene services; and where adolescent girls and young women are empowered.

## Our areas of interventions

We operate in the Iringa and Pwani regions, specifically within the following councils:

- Iringa Municipal Council
- Iringa District Council
- Kilolo District Council
- Mafinga Town Council
- Mkuranga District Council

# STRATEGIC GOALS

Water, Sanitation and Hygiene (WASH) Services Improved in Schools and Community.

Afyaplus Organizational Capacity Improved.

Adolescent Girls and Young Women Empowered to Exploit their Potential to the maximum.

## GOAL 1: WATER, SANITATION, AND HYGIENE (WASH) SERVICES IMPROVED IN SCHOOLS AND COMMUNITIES

The Afyaplus Organization has continued to advance the ultimate goal of the organization's development agenda of improving WASH services in schools and communities, leading to long-term strength and comfort for students and their families. By focusing on preventing and controlling WASH-related diseases through targeted initiatives, the organization aims to create sustainable improvements in health outcomes, educational attainment, and gender equality. Through its work, the organization contributes to achieving Sustainable Development Goal 4: Quality Education and Goal 6: ensuring access to water and sanitation for all by 2030.

*TAWASANET Secretariat team, NGO Registrar, representatives from Ministry for Water, Ministry for Home Affairs and Ministry of Community Development, Gender, Women and a special group exploring our hand washing station in Saba Saba primary school in Iringa MC.*

Despite global recognition that clean water and sanitation are basic human rights, many people still lack access to these essential resources. In Tanzania, the Constitution acknowledges the human right to water and sanitation, and national plans emphasize the importance of equitable access to quality WASH (Water, Sanitation, and Hygiene) services (UNICEF WASH report 2020). However, poor sanitation and hygiene conditions remain prevalent, amplifying the occurrence of preventable illnesses such as cholera, which frequently causes severe diarrhea and dehydration.

# A: THE SAFE PAD LAB PROJECT

Afyaplus organization with the support of the Malala Fund is implementing a three-year project called the Safe Pad Lab Project in 52 schools within four councils; Iringa MC, Iringa DC, Kilolo DC, and Mafinga TC. The project aims to break down barriers facing school girls' during menstruation by employing various interventions, such as awareness sessions on MHH and ASRHR, establishing safe pad laboratories, and providing capacity-building workshops on how to produce reusable sanitary pads through established reusable sanitary pad laboratories in 15 schools in the Iringa region. We would like to express our gratitude to the Afyaplus team and other stakeholders for continuing to implement the safe pad lab project within the four districts of the Iringa region.

*Students at Ilula Secondary School in Kilolo DC attentively listening to an Afyaplus Community-Based Trainer facilitating a sewing session.*

# ACTIVITIES AND ACHIEVEMENTS

## Session on making reusable sanitary pads

To effectively produce reusable sanitary pads, students involved in Menstrual Health Hygiene (MHH) and Adolescent Sexual and Reproductive Health and rights (ASRHR) acquire a range of skills. These skills includes Technical Skills, Sewing, and Fabric Handling, whereby students need to learn basic sewing techniques, including stitching, cutting, and pattern making. They should be familiar with different types of fabrics, their properties, and how to choose the right fabric for sanitary pads.

*Students at Ilula Secondary School and Kilolo Secondary in Kilolo DC attentively participate in sewing reusable sanitary pads under the supervision of Afyaplus community-based trainer Ms. Salome Ndumbaro.*

## Monitoring the progress of safe pad labs established

Furthermore, in this reporting period, the Afyaplus team has managed to conduct follow-ups on the 14 established safe pad laboratories to see the project's progress and its impacts on the students. It was discovered that the five schools that completed their sessions are now producing their pads and distributing them to school girls. So far 775 pads have been produced and distributed to 258 school girls.

## B. WATER IN SCHOOLS PROJECT

The Water in School project aims to contribute to sustainable development goals number 4 (quality education) and 6 (clean water and sanitation) by implementing a WASH initiative that includes for school children and benefits a total of 24,208 school children, teachers, and other school workers in the Iringa region. This project aims at improving access to clean and safe water by constructing hand washing stations in schools and providing sanitation and hygiene education. The Water in School project is an initiative implemented by the Afyaplus organization with the specific goal of protecting the school community from WASH-related diseases.

*Newly constructed hand washing station at Irole Secondary School in Kilolo DC, which is at the final stages of construction before being handed over to the school community.*

According to CDC report of 2021, handwashing with soap can reduce the risk of respiratory infections by up to 16%. Therefore, Afyaplus organization promote good hygiene practices by building hand washing stations that will allow students to wash their hands regularly which will reduce the risk of illness and infection from WASH related diseases.

# ACTIVITIES AND ACHIEVEMENTS

## Preliminary assessment of sanitation and hygiene situation in Iringa schools

in this reporting quarter the Afyaplus organization in collaboration with the school management team, was able to conduct a simple survey to capture and assess the current situation of access to clean water and sanitation facilities, as well as hygiene practices, in two secondary schools of Irole and Isimani.

The following are the findings of the survey conducted at 2 mentioned schools above

### 01. Irole secondary school.

The situation at Irole Secondary School highlights a critical issue regarding the inadequate provision of sanitation facilities, specifically access to clean and safe water for handwashing. With 681 students in total and only one water tap available, it is evident that the current infrastructure is insufficient to serve the needs of all students effectively. The imbalance in the number of girls (370) and boys (311) further exacerbates the problem, as more students are competing for limited resources.

*Hand washing station observed during the baseline survey. The station has two water taps, but only one is functioning, serving 681 students and other staff in the school.*

## 02. Isimani Secondary School,

The water infrastructure is severely inadequate, with only one water tap available for 1067 students and their teachers. This situation poses a significant challenge as the limited water supply is insufficient to meet the needs of the school population. The disparity in the number of girls (724) and boys (343) further exacerbates the issue, as it indicates a higher demand for water facilities among female students.

*Hand washing station observed during the baseline survey in Isimani secondary school. The station has one water tap, serving 1057 students and other staff in the school.*

Promoting good hygiene practices in schools can have a significant impact on public health outcomes. By teaching students proper hygiene habits early on, schools contribute to reducing the spread of infectious diseases, improving overall well-being, and fostering a culture of cleanliness because schoolchildren will carry and share the acquired knowledge with their families and the community as a whole.

## Construction of hand washing facilities in two Secondary Schools from Kilolo DC and Iringa DC

In the second quarter of 2024, the Afyaplus organization successfully constructed two hand-washing stations at Irole Secondary School in Kilolo DC, and Isimani Secondary School in Iringa MC. The construction is ongoing, with more than 70% completed. Each station will have eight water taps upon completion. The aim is to provide students with readily available and accessible handwashing stations, promoting regular handwashing and reducing the spread of germs and diseases. The station will comprise 8 water taps that will be used by students and will benefit a total of 1738 students (1080 girls and 658 boys).

*Newly Hand washing station constructed at Isimani secondary school in Iringa Dc*

In this scenario, the completion of these hand-washing facilities in two schools will make a total of 40 schools reached by this project and is going to serve a total of 24,208 students, comprising 12,995 girls and 11,213 boys. The importance of proper handwashing practices cannot be overstated, especially in educational settings where large numbers of individuals gather daily. Effective hand hygiene is crucial in preventing the spread of infectious diseases and promoting overall health among students and staff.

## Establishment of Afyaplus SWASH Clubs in 12 Schools

In this quarter, Afyaplus has managed to establish Afyaplus SWASH (school, Water, Sanitation, and Hygiene) clubs in 12 Schools located in both primary and secondary schools within the Iringa Municipal Council area. These clubs aim to instill lifelong habits and foster a culture of cleanliness. By targeting multiple schools, we strive to maximize our impact and provide young individuals with essential education on sanitation and hygiene practices.

The SWASH Clubs are designed to empower students with the knowledge and skills they need to maintain good hygiene, both at school and at home. Through engaging activities and interactive sessions, we help students understand the critical role proper sanitation plays in their health and well-being. This initiative mitigates the risks associated with poor sanitation, such as outbreaks of waterborne and hygiene-related diseases. These sessions were conducted by Afyaplus community-based trainers who play a significant role in moderating the activities of these clubs. We are privileged to receive positive feedback from both school management and students.

The following is the list of schools where the Afyaplus SWASH clubs were introduced and formulated in collaboration with the school management

The SWASH clubs were formulated in 6 primary schools which are Kigonzile, Ukombozi, Igeleke, Mtwivila, Igumbilo, and Kibwabwa together with 6 secondary schools which are Mkwawa, Mivinjeni, Miyomboni, Kleruu, Ipogolo, and Mtwivila. Out of 12 SWASH clubs established a total of 299 students (184 girls and 115 boys) from 5 schools were reached with the sanitation and hygiene sessions. Below is a graph that shows the distribution of students reached on sanitation and hygiene sessions conducted per school.

*On going SWASH Club sessions in Miyomboni secondary, Kibwabwa primary school and Kigonzile primary school*

Through the SWASH Clubs students were capacitated in the following; The best use of water, The Importance of hygiene at school, Diseases caused by dirt, Times to Wash Hands, Correct Steps to Wash Hands, Cleanliness of toilets, Starting environmental projects, Visiting water sources, Plays/ Games/ Environmental mapping

With the help of Girls Vision for Education facilitators, Afyaplus successfully hosted 6 in-person workshops for 30 girls and young women who are in and out of school. This initiative reached three districts: Iringa DC and Kilolo DC in the Iringa region, and Mkuranga DC in the Pwani region. The program empowers girls and young women to redefine their educational experiences through in-person workshops. We are thrilled to be part of this global movement of amplifying marginalized voices and striving for educational equity. The workshop was a huge success! The girls provided valuable insights, bringing us closer to making their educational dreams a reality.

**In school workshops**

Three workshops for students aged 10-13 and 15-17 were successfully conducted. These workshops provided a platform for girls and young women to share and envision what education should look like by imagining the current situation, analyzing the hindering factors, and developing a vision for an improved educational experience. This vision will be used as an advocacy tool to empower girls' education journey. Through these efforts, 3 workshops were conducted in 3 schools; Isimani Primary School in Iringa DC, reaching 5 pupils; Dundani Secondary School in Mkuranga DC, reaching 5 students; and Mwinyi Secondary School in Mkuranga DC, reaching 5 students.

Three workshops were conducted for in-school students and pupils, reaching 15 participants in Iringa DC and Mkuranga, as part of the Girls Vision for Education program.

## Out school workshops

We have managed to conduct three workshop meetings with girls and young women aged 16-19 living in rural areas who are out of school due to various challenges they have faced in their academic journeys. These workshops provided a platform for participants to share their experiences and envision an ideal education system. Out-of-school girls reflected on their past education experiences; analyzed the factors influencing them and developed a vision for an improved educational experience. One workshop was held in Wenda Ward in Iringa DC, reaching five girls and young women, and two workshops were held in Lulanzi Village in Kilolo DC, engaging ten girls and young women.

*Workshops conducted for out-of-school girls and young women, reaching 15 participants in Iringa DC and Kilolo DC during the Girls Vision for Education program.*

In recognizing girls' time and efforts to participate in and complete these workshops, Afyaplus has celebrated and awarded girls certificates of appreciation. Their views and insight will effectively help to create a vision and advocate for girls' rights to access quality education and fulfill academic aspirations. Our deepest gratitude goes to the Malala Fund for partnering with us; together, we aim to ensure every girl has access to quality education.

We are also grateful to all the workshop participants for their openness, ideas, and enthusiasm. Together, we are turning visions into reality! A special thank you to our Girls' Vision facilitators for their dedication and effort in building the vision for girls' education and facilitating these workshops.

## AFYAPLUS WELCOMES NEW BOARD OF DIRECTORS

This quarter, we are delighted to welcome our new Afyaplus Board of Directors, who have joined us to strengthen our organization and enhance our collaborative impact in serving our community. This board comprises expert stakeholders dedicated to guiding and governing our organization across various areas. They will play a crucial role in strategic decision-making, fostering accountability, and shaping our future.

### Meet our New Board of Directors:

Dr. Tula Ngasala  
Chairperson

Dr. Tula is an expert in civil and environmental engineering with a focus on water resources. She holds a Ph.D. from Michigan State University and has over 15 years of academic and industry experience. Currently, she is an Adjunct Scholar at Michigan State University and a Project Engineer at Spicer Group Inc.

Ms. Suzan Yumbe  
Secretary

Suzan has nine years of experience in Water, Sanitation, and Hygiene (WASH) and is a professional Health Officer. She is an alumna of the Mandela Washington Fellowship (YALI) and the Founder and Director of Afyaplus Organization.

Godfrida Magubo  
Treasure

She is dynamic international relations practitioner with a BA in Political Science and Public Administration. She holds certifications in Leadership, International Communication Skills, and Gender and Inclusion. An expert in SDGs, Advocacy, and Marketing, she has served as the Head of the Representative Office at the British High Commission in Dar es Salaam.

Samwel Sudi  
Board Member

Mr. Sudi, recognized by the UNFCCC as a climate change and climate finance expert, currently advises on Climate and Water at GIZ Tanzania. His expertise includes adaptation planning, enhancing coordination, mainstreaming climate risks, and identifying priority adaptation investments.

Ms. Cikay Richards  
Board Member

Cikay is a dynamic professional with extensive experience in management consulting, international development, and non-profit leadership. She is the Founder and Partner of Rehoboth Advisory, CEO of Lyra Africa Tanzania, and the former Executive Director of the European Business Group Tanzania. Known for her strategic acumen and commitment to public service, she has achieved collaborative success across Africa and Europe.

Mr. Severine Allute  
Board Member

Mr. Severine, a distinguished board member, brings over 20 years of expertise in International Relations, Peace and Security, and WASH. He leads the Tanzania Menstrual Health and Hygiene Coalition and serves as the Country Focal Point for SWA and SAPSN. He is also a director at the Africa Diaspora Foundation and a founder of the Institute of Peace and Conflict Studies (IPCS).

Mr. Simon Nchimbi  
Board Member

Mr. Nchimbi, an experienced Environmental Health Officer at Muhimbili Orthopaedic Institute, specializes in public health protection. He currently works with the Ministry of Health as a National Facilitator for the WASH FIT tool to improve sanitation in healthcare facilities. Additionally, he has pioneered electronic systems for disease surveillance and response in Tanzania. His expertise significantly enhances health and sanitation practices nationwide.

The board has already held its first meeting and established its leadership. We are pleased to announce that Dr. Tula Ngasala will serve as the Chairperson, Ms. Suzan Yumbe will serve as the Secretary, and Ms. Godfrida Magubo will serve as the Treasurer. We are confident that this board will bring their expertise, passion, dedication, energy, and vision to Afyaplus. They will undoubtedly steer our organization towards a sustainable future. We are immensely grateful for their commitment.

Afyaplus extend deepest gratitude to the previous Afyaplus Board of Directors for their contributions to the growth of the Afyaplus Organization. Commitment and support during your tenure have been instrumental in our success. Thank you for your dedication and service.

## EVENTS AND CAMPAIGNS

### Celebrating Menstrual Hygiene Day 2024

This year, Afyaplus celebrated Menstrual Hygiene Day by organizing an awareness campaign focused on menstrual health hygiene. Safe Menstrual Hygiene Day, celebrated on May 28 each year, was marked with the distribution of reusable sanitary pads at Lugalo Secondary School in Iringa MC. These pads were made by students through the Safe Pad Lab project, which provides a space for them to produce their reusable pads.

Along with that, the team has successfully raised awareness on Menstruation Health Hygiene, its benefits, the roles of various stakeholders, and the importance of celebrating Menstrual Hygiene Day annually on May 28.

*The photo above shows various activities conducted during safe Menstrual Hygiene Day, at Lugalo Secondary School in Iringa MC such as MHH and ASRHR awareness campaign and pads distribution to school girls.*

### Commemoration of Menstrual Hygiene Day at National level in Arusha region

Every year on May 28, the world unites to celebrate Menstrual Hygiene Day, a day dedicated to raising awareness about menstrual health and hygiene (MHH). This year's international slogan, **“Let’s stand together for a period-friendly world”** highlights the global effort to empower, educate, and advocate for better menstrual health for all.

In Tanzania, the national celebration took place in Arusha, bringing together various MHH stakeholders to underscore the importance of this day. The event was honored by the Deputy Minister for Health, Hon. Godwin Molllel (MP), who stressed the significance of parents and guardians specifically male parents to consider girls' needs and participate in discussions surrounding menstrual health, the establishment of period-friendly infrastructure in schools, and access to affordable reusable pads. He highlighted that education on Menstrual Health Hygiene (MHH) and Adolescent Sexual and Reproductive Health and Rights (ASRHR), along with increased investment in these areas, is essential for the well-being of young girls.

*Photos showing the Afyaplus Coordinator, the Deputy Minister for Health (MP), and other participants posing for photos during the commemoration of MHH day in Arusha.*

Afyaplus Organization, represented by the Program Coordinator, proudly celebrated World Menstrual Hygiene Day in Arusha. The organization has been at the forefront of promoting menstrual health through various initiatives, including the Safe Pad Lab Project aiming to dismantle the barriers schoolgirls face during menstruation and enhance awareness on good MHH and ASRHR practices.

The Safe Pad Lab Project has reached 35,000 schoolgirls, surpassing its initial goal of 30,600. Operating primarily in Iringa, we have successfully implemented our menstrual initiatives in 62 schools. Empowerment begins with education, and our efforts focus on breaking the stigma around menstruation, advocating for accessible facilities, and providing affordable menstrual products.

### **Afyaplus Participates in TAWASANET Meeting**

Afyaplus, represented by the Program Coordinator, actively participated in the TAWASANET meeting held in the Iringa region. The primary objective was to assess the contributions of non-governmental organizations (NGOs) implementing water, sanitation, and environmental projects, specifically the WASH (Water, Sanitation, and Hygiene) project by reviewing TAWASANET progress report of 2023 and develop strategies to enhance the upcoming 2024 report. This important gathering took place at the Mount Royal Hotel in Iringa on June 18, 2024.

The session brought together representatives from TAWASANET, Afyaplus, the Ministry of Water (MoW), registrars of NGOs, and officials from the Ministry of Community Development, Gender, Women and Special Groups, and the Ministry of Home Affairs.

Additionally, organizations have been reminded to diligently follow government guidelines, regulations, and priorities for effective cooperation and compliance.

### **Afyaplus hosted a group of visitors**

Afyaplus was honored to host a distinguished delegation including representatives from the TAWASANET Secretariat, the Ministry of Home Affairs, the Ministry of Water, and the Ministry of Community Development, Gender, Women, and special groups. They visited organization headquarters to gain insights about community initiatives and management strategies. We presented organizational profile, and discussed our current impacts, ongoing WASH activities, and plans.

Later on, the visitors had an opportunity to visit Sabasaba Primary School, it one among the school benefit from Water In School Project which aims to enhance Water, Sanitation, and Hygiene (WASH) services.

*Visitors exploring our hand washing station at Saba Saba Primary School in Iringa Municipal during their visit.*

They also visited the Safe Pad Lab Project at Lugalo Secondary School, which focuses on providing reusable sanitary pads to support girls' education by addressing Menstrual Health Hygiene. Through this project, conducted awareness sessions on MHH and ASRHR, and established a reusable sanitary pad laboratory that produces high-quality, hygienic reusable sanitary pads.

*Visitors exploring our Safe Pad Lab at Lugalo secondary school in Iringa Municipal during their visit.*

Afyaplus express deeply gratitude for the continuous support and encouragement from visitors. Their interest and involvement are invaluable to the success and expansion of Afyaplus projects. We look forward to further strengthening partnerships to better serve communities. The inspiration and motivation drawn from visits motivates organization to continue the mission with renewed energy. We wholeheartedly welcome our visitors to return and engage with us again.

*Members during the field exploring our hand washing station at Saba saba primary school in Iringa Mc*

## Community assessment for the Water Station installation Project in Mangalali Village.

The Afyaplus Team, led by Executive Director, recently conducted a community assessment for the Water Station installation project in Mangalali Village. The team engaged with the Village Executive Officer, Village Chairperson, Ward Community Development Officer, and Water Committee members to discuss the latest updates on project approval and the next steps towards its implementation.

*The Afyaplus team and Mangalali community members during Awareness meeting on water installation project in Mangalali Village, Iringa DC.*

The efforts made by Afyaplus in conducting a community assessment, engaging with key stakeholders, and conducting a field survey demonstrate a significant step towards improving water access for the Mangalali community. By collaborating with local authorities and leveraging expertise from organizations like Engineers Without Borders USA, Afyaplus is making tangible progress towards addressing water accessibility challenges in Mangalali Village.

*Afyaplus team and Mangalali community representatives visiting existing water sources for the installation of water stations in Mangalali Village, Iringa DC.*

## Advocating for Educational Reform: Afyaplus Contributes to National Committee Review

On June 26, Mr. Emmanuel Gilbert from the Afyaplus team had the honor of representing our organization at the National Committee for the Review of the Education Act, hosted by the Tanzania Education Network (TENMET) at the Sheraton Hotel in Dar es Salaam.

*Mr. Emmanuel Gilbert sharing crucial insights on necessary changes, inclusivity in girls' education, and child protection and safeguarding. during the meeting*

We shared crucial insights on necessary changes, inclusivity in girls' education, and child protection and safeguarding. Key issues we presented for consideration included incorporating a re-entry policy in the act, tax exemption for sanitary pads, leveraging ICT in teaching and learning processes, continuous professional development for teachers, removal of corporal punishment in favor of positive disciplinary measures, declaring education as a fundamental human right, and emphasizing the provision of quality education in schools. We are grateful for the opportunity to advocate for these positive changes and contribute to the advancement of education in Tanzania.

## MILESTONES ACHIEVED IN THIS QUARTER

1. Afyaplus has successfully established, 12 Afyaplus SWASH Clubs and conducted awareness training for a total of 299 students, including 115 boys and 184 girls, from 12 schools of Iringa Municipal Council in the Iringa region.
2. Afyaplus has attained a significant milestone in this second quarter in partnership with Engineer Without Borders USA. Expect to collaborate on the Water Station Project in Mangalali Village where 95% of the project cost will be funded by an Engineer Without Borders USA while 5% will be community contribution to ensure project sustainability. The Water Station Project will make tangible progress towards addressing challenges of water accessibility in Mangalali Village.
3. Through the Water in Schools project, in this second quarter, Afyaplus organization has successfully constructed two hand washing facilities in 2 schools which are Irole Secondary School and Isimani Secondary School. The hands washing facility is expected to serve a total of 1738 students (658 boys and 1080 girls). The hand-washing stations make a total of 15 stations constructed that will be added to the previously 25 schools and bring a general number of 40 schools reached by the water-in-school project.
